

CLAIM AMENDMENTS

1. (Currently Amended) A combined stanchion cover and signage system, comprising:  
an elongated sleeve having a closed top and an open bottom defining a length, enabling the sleeve to be placed over a post or stanchion to be covered; and  
a message-bearing panel integrally formed with the sleeve into a one-piece unit using a polymeric molding process, the message-bearing panel extending above the closed top of the sleeve, the panel having a height which is substantially less than the length of the sleeve.
2. (Original) The combined stanchion cover and signage system of claim 1, wherein the sleeve is generally cylindrical in shape.
3. (Original) The combined stanchion cover and signage system of claim 1, wherein at least the sleeve is composed of a polymeric material.
4. (Original) The combined stanchion cover and signage system of claim 1, wherein the message-bearing panel includes a recess or slot to receive a separate sign.
5. (Previously Amended) The combined stanchion cover and signage system of claim 2, wherein the sleeve has an inner diameter in the range of 2 to 8 inches.
6. (Canceled)
7. (Previously Amended) The combined stanchion cover and signage system of claim 1, wherein the message-bearing panel is in the form of a decal included during the same molding process.
8. (Currently Amended) A combined stanchion cover and sign holder, comprising:  
an elongated generally cylindrical sleeve of polymeric material, having a closed top, an open bottom, and an inner diameter in the range of 2 to 8 inches; and

a holder for a sign extending above the closed top of the sleeve, the holder and sleeve being integrally formed into a one-piece unit.

9. (Previously Amended) The combined stanchion cover and sign holder of claim 8, wherein the sign is a decal integrally formed in the sign holder.

10. (Previously Amended) The combined stanchion cover and signage-bearing panel system of claim 1, wherein the message concerns parking or traffic flow.

11. (Previously Added) The combined stanchion cover and sign holder of claim 8, wherein the sign concerns parking or traffic flow.
